are folded towards each other about the first hinge joint (5). The thin-walled body (2) is further provided with a third hinge joint (9) extending in a third direction (P3) crossing the first hinge joint (5) and arranged at a distance from the second hinge joint (8). The thin-walled body is adaptable to an outwardly bulging shape change of the flexible wall (24) on which the device is intended 20 to be attached. The invention also relates to a package provided with such a resealable opening device.
